8.2	Exposure controls					
	Appropriate engineering controls					
	Avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after					
	handling the products. <i>Personal protective equipment</i>					
	Hygiene measure					
	Immediately change contaminated clothing. Apply preventive skin protection. Wash hands and face					
	after working with the product.					
	Eye/face protection					
	Tightly fitting saftey goggles; Faceshield (8-inch minimum). Use equipment for eye protection					
	tested and approved under appropriate government standards such as NIOSH (US) or EN 166 (EU).					
	Skin protection					
	Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique					
	(without touching glove's outer surface) to avoid skin contact with this product. Dispose					
	contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands. The selected protective gloves have to satisfy the specifications of EU					
	Directive 89/686/EEC and the standard EN 374 derived from it.					
	Body protection					
	Complete suit protecting against chemicals. The type of protective equipment must be selected					
	according to the concentration and amount of the dangerous substance at the specific workplace.					
	<b>Respiratory protection</b> Page <b>3</b> of <b>7</b>					

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Environment exposure controls Do not empty into drains.
