	Appropriate engineering controls				
	Avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after				
	handling the products.				
	Personal protective equipment				
	Hygiene measure				
	Immediately change contaminated clothing. Apply preventive skin protection. Wash hands and face				
	after working with the product.				
	Eye/face protection				
	Tightly fitting saftey goggles; Faceshield (8-inch minimum). Use equipment for eye protection tested				
	and approved under appropriate government standards such as NIOSH (US) or EN 166 (EU).				
	Skin protection				
	Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique				
	(without touching glove's outer surface) to avoid skin contact with this product. Dispose				
	contaminated gloves after use in accordance with applicable laws and good laboratory practices.				
	Wash and dry hands. The selected protective gloves have to satisfy the specifications of EU Directive				
	89/686/EEC and the standard EN 374 derived from it.				
	Body protection				
	Complete suit protecting against chemicals. The type of protective equipment must be selected				
	according to the concentration and amount of the dangerous substance at the specific workplace.				
	Respiratory protection				
	Page 3 of 7				

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).
